# THE PROBLEM

*Firearms training is stuck in the past*

- ➔ 100+ years of paper & steel targets
- ➔ Training on static targets leaves shooters unprepared for highly dynamic encounters
- ➔ No persistent data, no analytics, no feedback loop
- ➔ Training outcomes depend on intuition instead of intelligence
- ➔ In high-stakes environments, missing data = real consequences

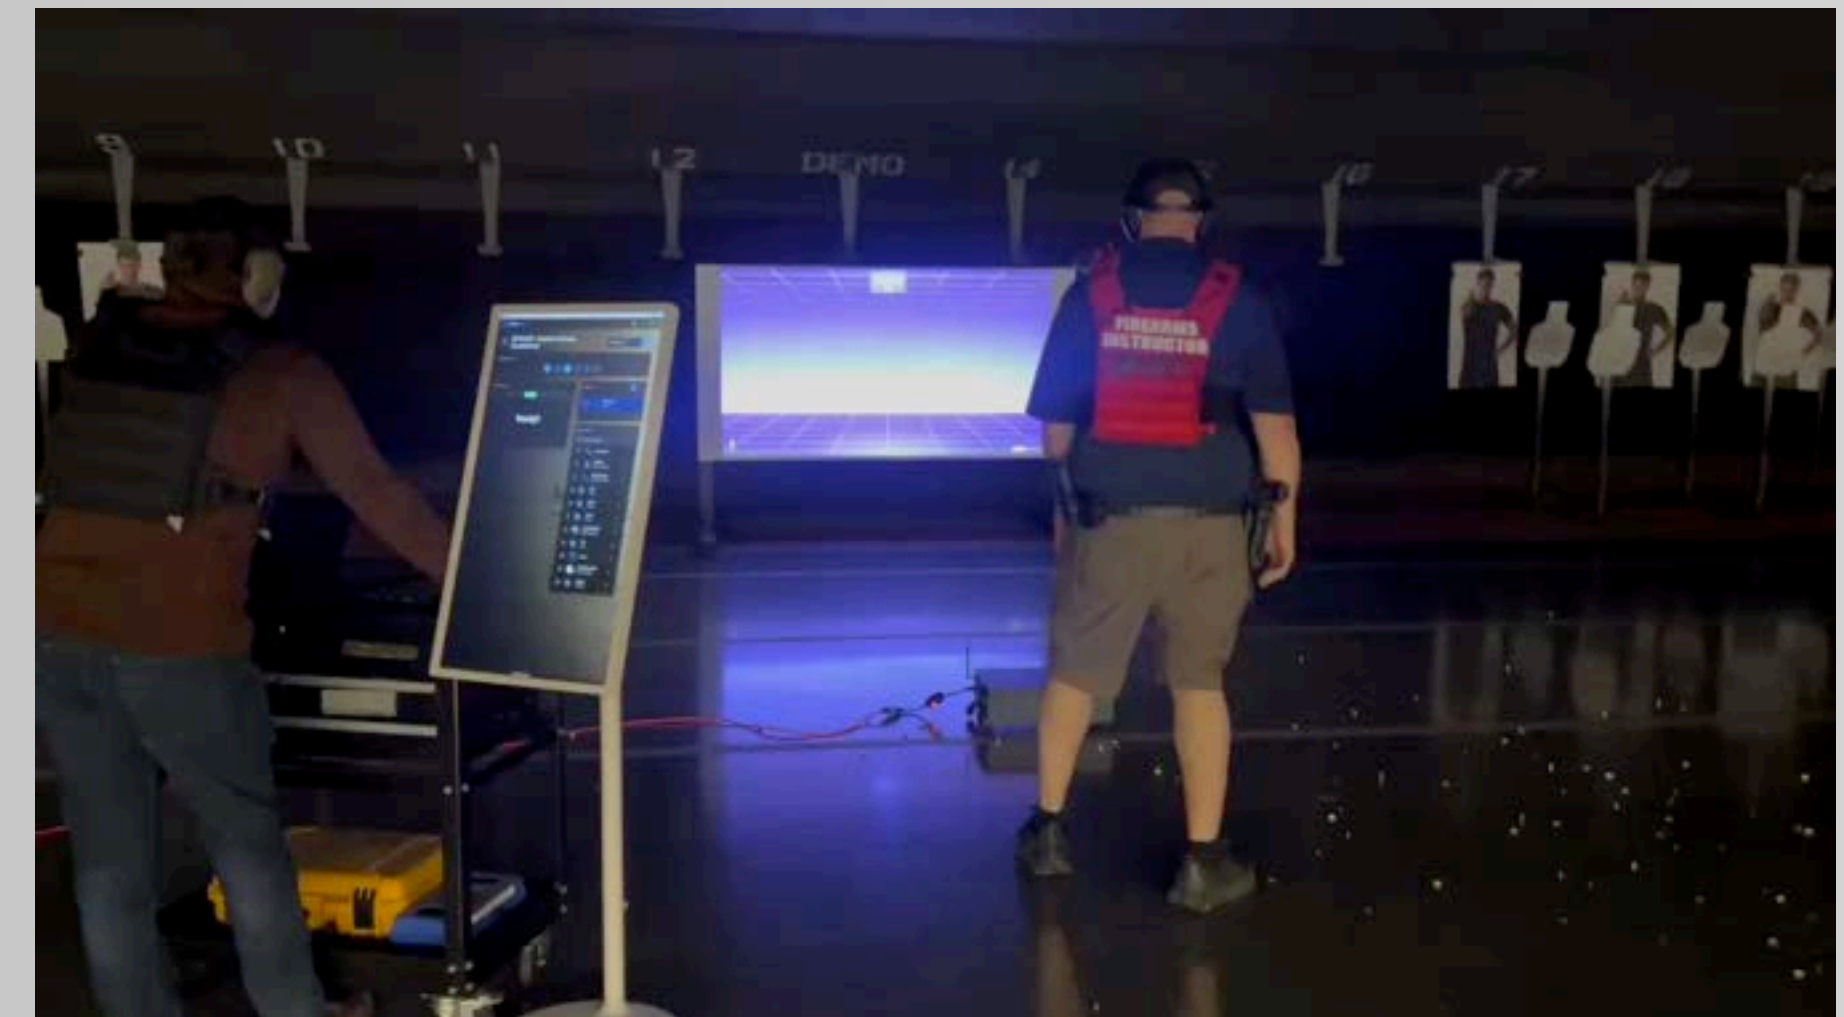

# THE SOLUTION: ACCUSHOOT LFX

## *Digitized Live-Fire Training*

- ➔ Modular, portable live-fire training platform
- ➔ Dynamic target projection + thermal imaging + AI computer vision
- ➔ Real-time scoring, session recording, and analytics
- ➔ No special weapons or devices needed - *train as you fight*
- ➔ Training is no longer static—it's dynamic, measurable, and life-saving

# HOW IT WORKS

*Every shot becomes data*

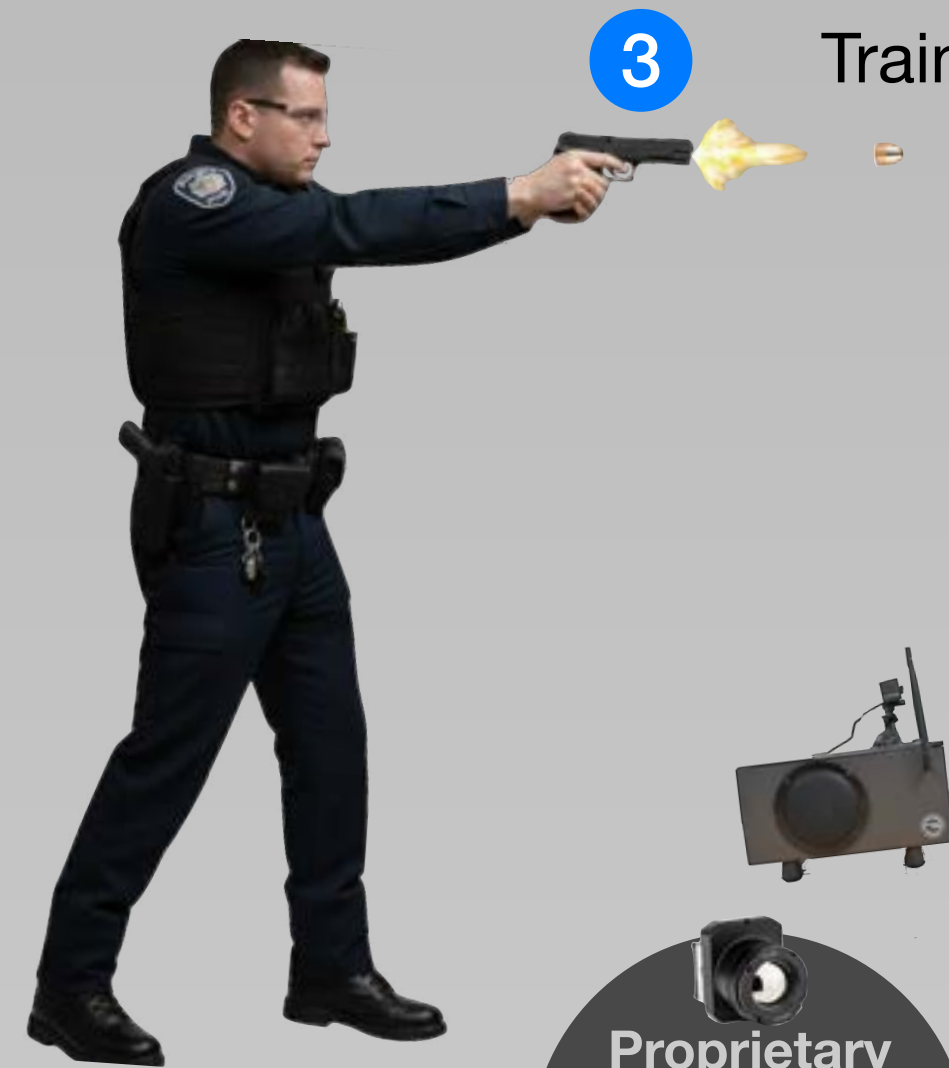

1 patent granted + 6 patent applications

1

Tablet-controlled drills with instant feedback

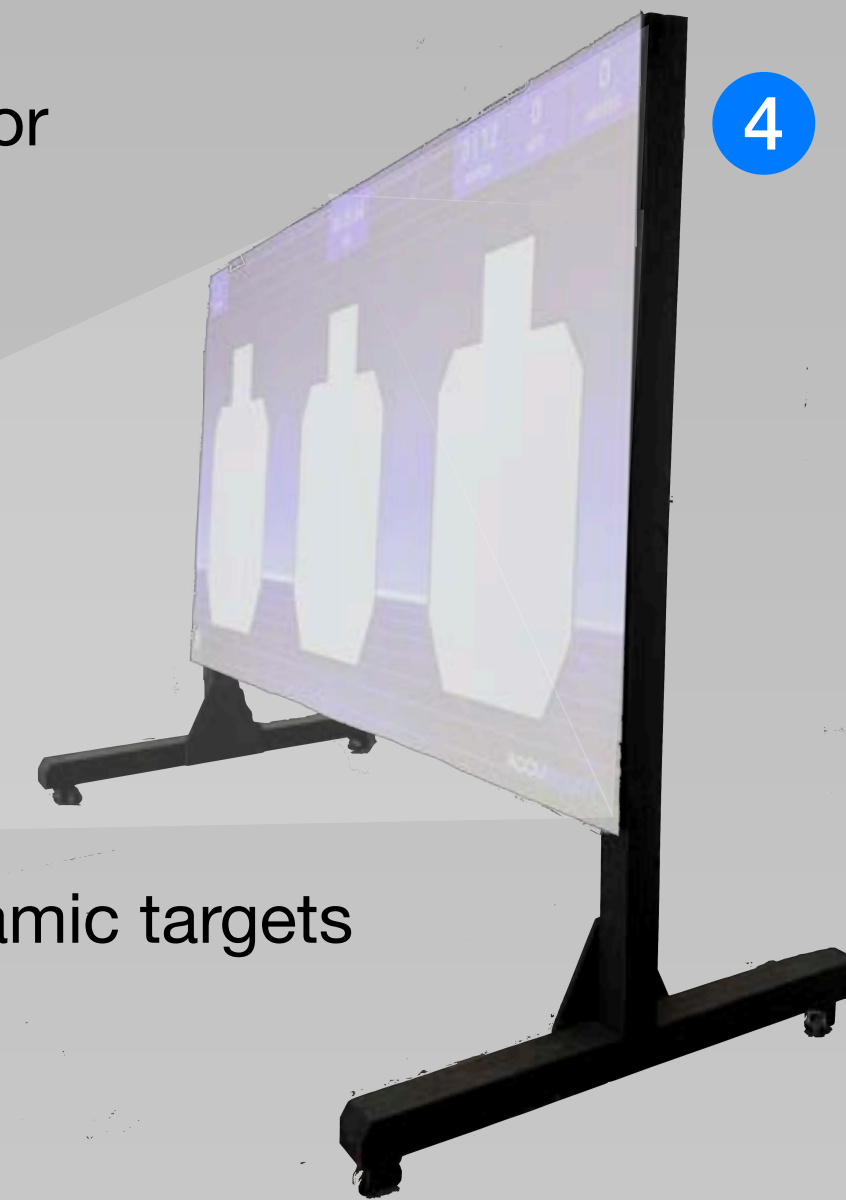

3

Train as you fight. No special weapons or devices needed

2

AccuShoot projects dynamic targets

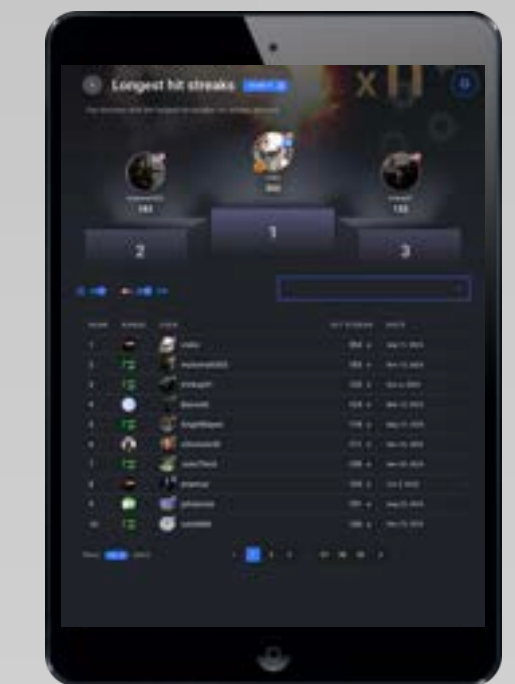

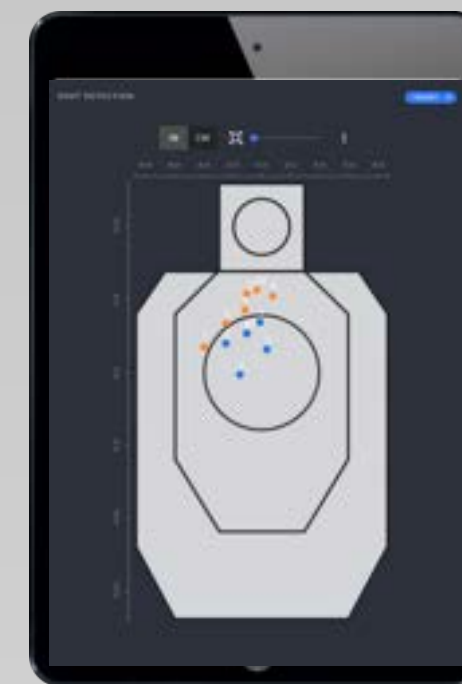

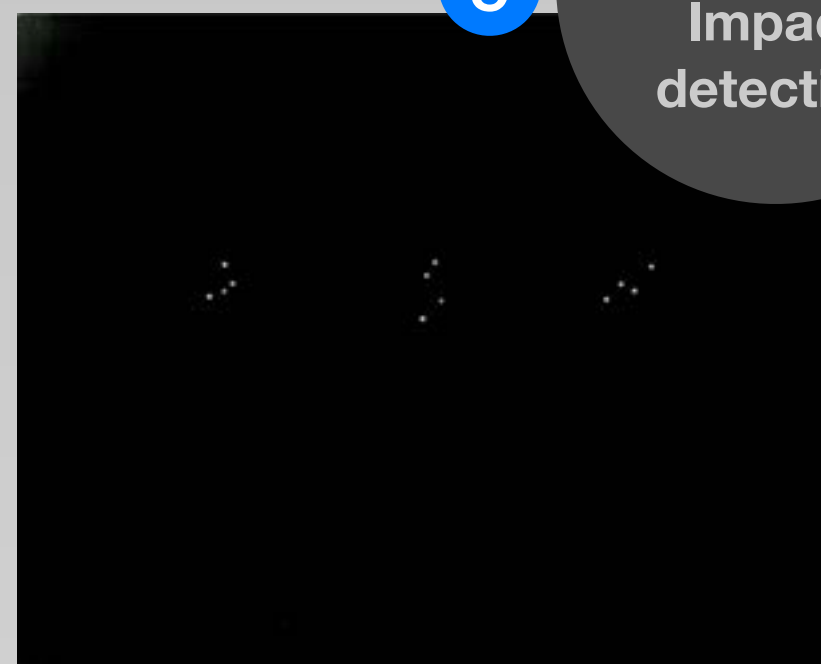

4

Self-healing screen detects every shot, every session

5

Proprietary Contour-based Impact detection

6

AccuShoot detects every impact in real time, generating a comprehensive Digital Record for each session.

7

Every shot becomes actionable intelligence

8

Tracks every shooter and training, connecting a worldwide community of shooters.

# THE ACCUSHOOT EXPERIENCE

*One platform, multiple training experiences*

## LFX — Live-Fire Experience

- ➔ Real guns, real ammo
- ➔ Combines the instant feedback of steel with the precision of paper
- ➔ Portable and scalable — from one lane to full-range deployments

## DFX — Dry-Fire Experience

- ➔ Ammo-free, works with any 780nm invisible laser
- ➔ Ideal for skill repetition, fundamentals, and safety
- ➔ Perfect for off-range, classroom, or low-ammo environments

## YFX — Yonder-Fire Experience

- ➔ Extends LFX to hundreds of meters and beyond
- ➔ Full tracking for sniper and precision rifle engagements
- ➔ Ruggedized, off-grid capable for remote deployments

## MFX — Multi-Fire Experience

- ➔ Links multiple LFX, DFX, and YFX systems
- ➔ Run synchronized, sequential, or adaptive drills
- ➔ Enables team tactics, competitions, and complex scenarios

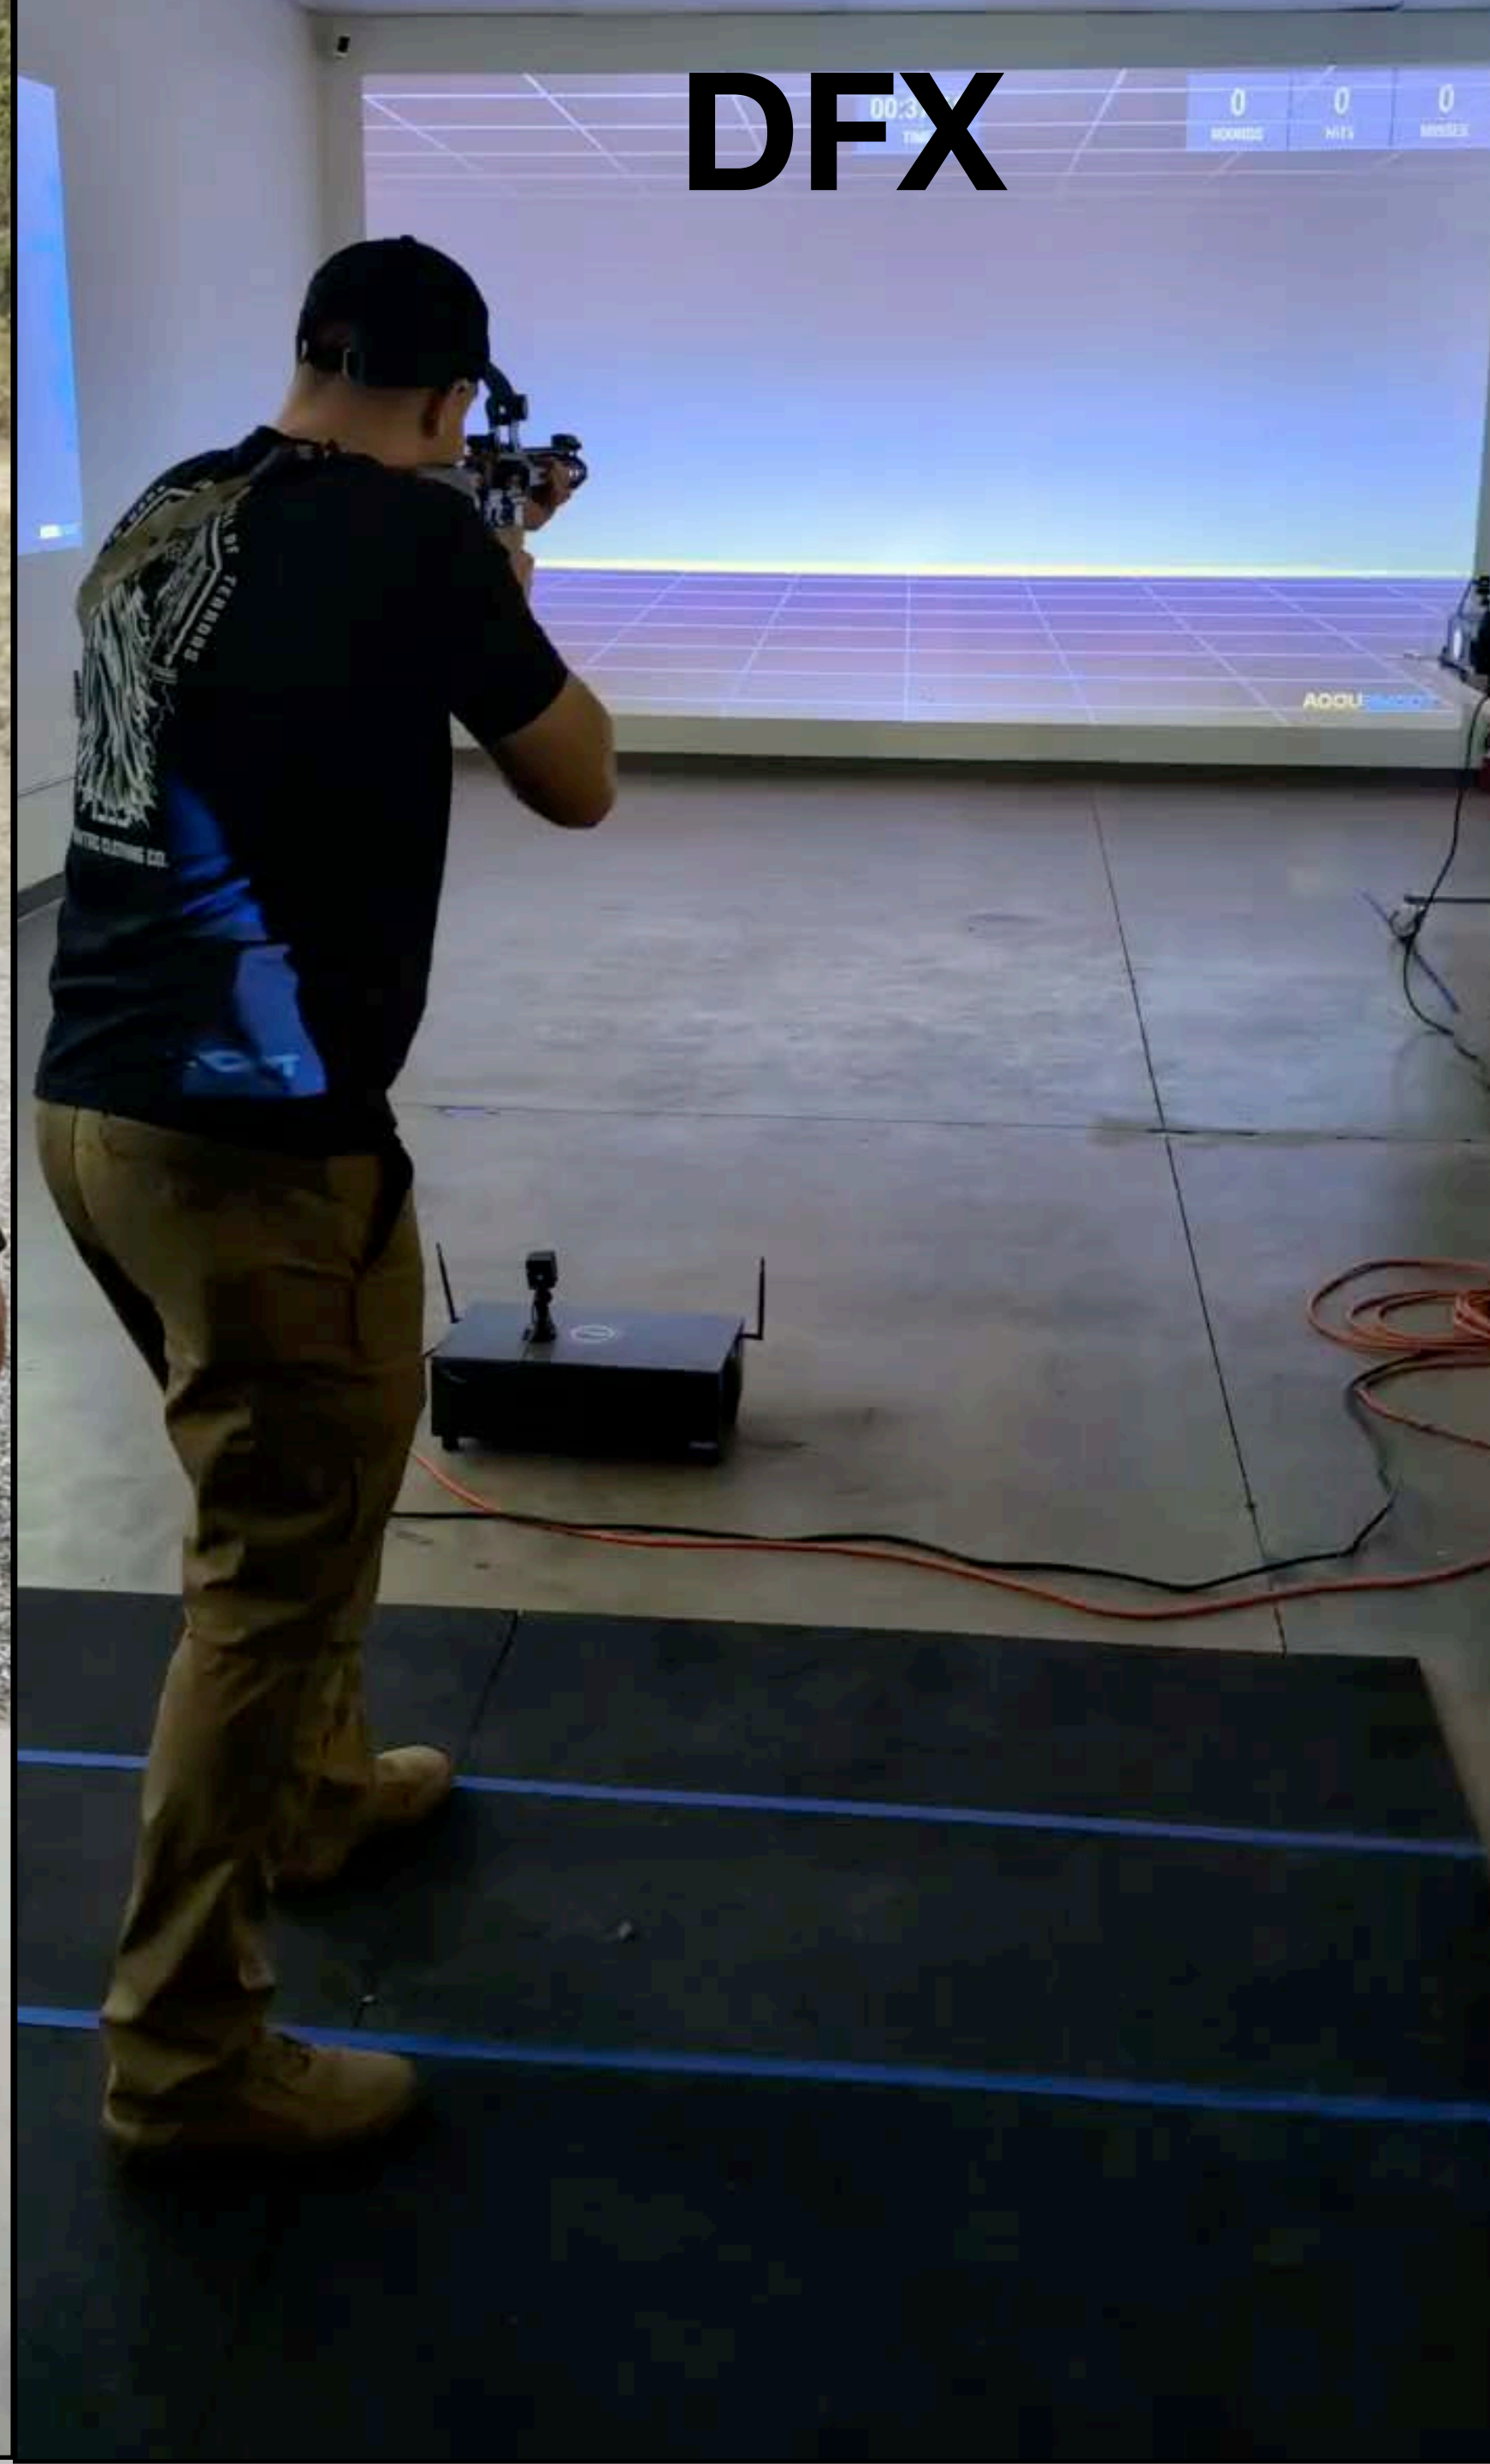

**LFX is the core. DFX removes ammo. YFX adds distance. MFX connects everything.**

# FROM SHOTS TO INTELLIGENCE

*Actionable insights, not just scores*

- ➔ Real-time shot placement, timing, and sequencing
- ➔ Identify training gaps (first-shot drop transition overshoot, etc.)
- ➔ A/B test gear, ammo, optics, and configurations
- ➔ ML-powered performance tracking and degradation detection

*From every trigger pull to actionable insight — AccuShoot LFX makes training measurable, repeatable, and smarter.*

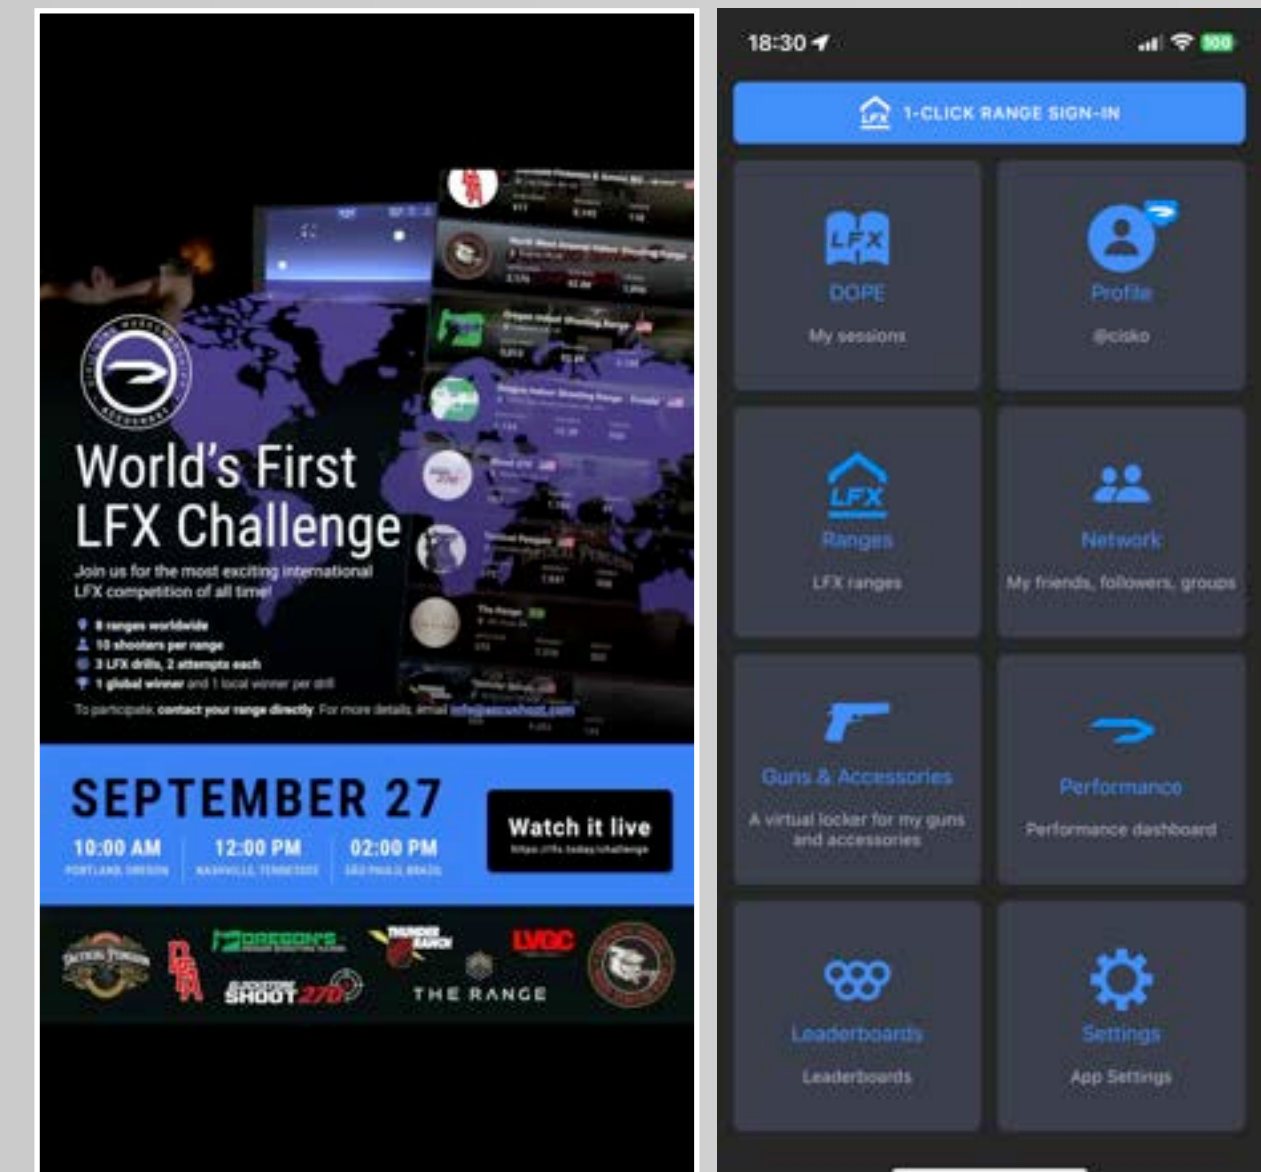

# DATA-DRIVEN SHOOTING COMMUNITY

*Training becomes measurable, social, and competitive*

- ➔ Persistent shooter profiles and digital lockers
- ➔ Web and mobile apps for leaderboards and challenges
- ➔ Distributed competitions and gamification
- ➔ Turns isolated range time into a global network
